

How to simplify overcomplicated Data Centre network security?

Thibault Surgeul – Senior Solution Engineer - UK / Ireland

The Complexity

- Global Manufacturer company
 - Dozens of subsidiaries from acquisitions
- Mission:
 - Setup hundreds of applications for Remote Access
 - Dozens of teams in charge
 - No one knows how they work
 - Reverse Engineering
- Consequences & pain:
 - Cost for Project & Operations
 - Firewalls with thousands of rules
 - Security by obscurity

Dissociate Security from the Network

- Service Provider
- Business pain: Remote Access too open & segmentation needed for Compliance
- Initially looking at:
 - NGFW
 - SDN
 - And us, as a Challenger
- Our promises:
 - No Infrastructure change
 - No downtime
 - Fast and easy proof in production
- Customer: If they're lying, we'll know very quickly
- How does it work?
